1954 INTRODUCTIONS

EASTER SUNRISE—A self of a luscious peach tint overlaid soft pink giving quite a pink over-all effect. The ruffled and very waffled petals have a wide white midrib with diamond overlay, the sepals also are heavily sprinkled with silver. The throat is of a most luminous green-gold lavishly shot with sparkling gold.

Large, broad form resembling a Dutch amaryllis, distinctly creped with fluted edges, opens wide and the petals have that certain flare that twists them on the end lending an exotic effect.

Truly this hemerocallis has to be seen for one to realize how lovely it is. This clone was named by Mrs. W. H. Keen, our Regional Supervisor, who when she first saw it exclaimed "Oh, Easter Sunrise, just as the sun comes over the Blue Mountains. An exotic, lavish beauty!\$25.00 net

VELVET BUTTERCUP—Large, full, beautifully formed pure buttercup yellow throughout. Very velvety and has the substance of a banana skin. Huge clones and attractive foliage. Has created much interest here\$10.00 net

* * *

IVORY CHASTE—Very large, wide petaled, purest ivory coloring. This is not white, nor is it cream, it is pure ivory with a lacquered finish. Stands supreme through wind, rain or heat. Best planted in full sun. This flower has great beauty of form and gives a bold, luminous effect.\$10.00 net

PIEFACE MISSY—The LOVE of our garden! Chosen by all who saw it for introduction. Bright and sparkling in variegated shades of yellow, although it gives a self effect. Large, full, wide open and fluted like a pie. 40 in. tall. Only its vigorous nature allows our introducing this clone at this low price.\$5.00 net

OUR FORMER INTRODUCTIONS:

SELAH—Pure rich even gold self. All petals heavily and evenly crimped. While the two top petals completely overlap each other, covering the sepal, they are long and pinched like the pod parent Wau-Bun, though much wider. The lower petal is a fraction under two inches wide. Perfectly balanced, symmetrical clump on tall slender stiff stems. Midseason. 48 inches\$10.00 net

ORANJO—Extra large, pure solid orange. All segments are wide and full. Midseason, medium height, strong stems, many blooms and a heavy increaser.\$6.00 net

RED HAVEN—Large, widespreading, scarlet red with a fiery red eyezone. Unfading and fine. Nicknamed, by garden visitors, 'the red one.' Very well liked by those who grow it.\$5.00 net

MYSTIC MELODY—Absolutely huge in size! Wide open, spreading form. Rosy fawn petals and fawn sepals slightly overcast rose—bicolor in effect. The attractive form, heavy ruffling and huge size with its unusual coloring makes this one highly desirable. Moderate increaser and 34 in. tall.\$6.00 net

HEMEROCALLIS

... add just the right touch to your garden to bring out the charm and excitement you have been looking for. They are easily grown, and are so effective in the perennial border, in the foreground of the shrubbery border, for naturalizing through partly shaded woods, along the banks of lakes and streams and are adaptable to any climate. They can be planted any time of the year when the ground is not frozen, but our experience has been that they do better if planted in the spring or just after they are through blooming. **DO NOT PLANT YOUR HEMEROCALLIS TOO DEEP.** Spread your roots well out and allow for one inch of soil over where the roots join the crown of the plant.

The rapid development and improvement in Hemerocallis is giving us splendid new varieties to brighten our gardens at a time of year when there is a scarcity of bloom in our borders. We now have beautiful Daylilies, up to eight inches across, in shades that vary from pinks, reds, wines, maroon to purple, in many interesting shapes and forms.
